January 6, 2022

Good evening from St. Ann Rehab and Nursing Center,

Today we did a round of COVID testing for all residents and staff in house. The results have indicated we have 3 staff positive and 1 resident positive.

Based on the information we have obtained – we have every inclination that the THREE staff whom tested positive have acquired COVID- outside the facility- in the community. The ONE resident who has tested positive is located on the skilled unit. He/she is in a private room and on precautions as indicated by the NH Department of Health and Humans Services with whom we reported our outbreak to this afternoon. Our physician team is also aware of the situation in house and agrees with the action we have taken thus far.

We will continue testing staff tomorrow to ensure we have all staff accounted for in this round of testing and will re-test on Monday, January 10, 2022.

Visitation is still permitted- however; we may find it necessary to ask for you to comply with additional precautions to help keep our facility level positivity at bay.

Please feel free to reach out to either myself or Donna Nemet, DNS should you have any questions or concerns.

Thank you in advance for your support and patience as we work through this together

Kindly,

*Kate McCracken, LNHA, MHA*
