April 6, 2023

Good afternoon,

Yesterday we had a nurse test positive for COVID here at St Ann. He/she was sent home immediately and required to quarantine.

All residents and staff are being monitored for any signs or symptoms for COVID; however, we are confident this is an isolated incident as he/she were away on vacation recently.

Please know that COVID is still an issue with the multitude of variants out there and we will continue to do out due diligence to keep the concern at bay.

With the Easter holiday and gathering coming upon us- please know we are not offering family to eat in the dining room with residents at this time- we can accommodate very small parties in a couple areas here in the facility- but may not be able to accommodate all requests.

We continue to wear masks in all patient areas – practice thorough hand hygiene and use other PPE as needed (per facility policy).

Thank you again for your ongoing support and understanding.
